

CARAGH PRECISION

Galway company, Caragh Precision, operating from a new purpose built, state of the art 40,000 sq ft facility has been providing precision engineered solutions to the medical device industry both at home and abroad for over 26 years.

"Our core competency in providing precision machined metal and plastic components is complimented by our innovation centre which provides clients with a full turnkey service from product and equipment design to prototyping and new technology development. Caragh Precision are in a unique position by providing an innovation centre staffed by dedicated design engineers with significant machining experience and over 20 years combined medical device design experience gained from working in some of the

leading multinationals." explained Richard Gribbons, Innovation & Commercial Director.

This coupled with its location in the heart of the Irish medical device cluster allows the company to provide a wide range of services through its network of partners ranging from rapid prototyping, injection moulding, electropolishing, packaging, functional and biological testing and cleanroom services.

Caragh Precision specialise in orthopaedic instrumentation, cardiovascular applications, oncology and minimally invasive device and equipment design.
